ABOUT US

We are one of over twenty centers within the international Bilingualism Matters network, with the head/quarters at the University of Edinburgh, Great Britain. We operate in the Faculty of English at Adam Mickiewicz University in Poznań.

OUR MISSION STATEMENT

- increasing awareness of bilingualism and multilingualism,
- promoting multilingual education,
- dispelling myths surrounding language learning,
- presenting research results to parents, teachers and students to assist them in making informed decisions concerning language learning,
- promoting knowledge about language diversity in Poland and beyond,
- conducting research on language acquisition and multilingualism,
- collaborating with other BM centers to support international cooperation.

WE SUPPORT

- parents who want to raise bilingual children,
- children and their parents who want to participate in bilingual education,
- teachers who teach bilingual children,
- teachers who teach in bilingual programmes,
- people who use languages of national, ethnic and regional minorities,
- people with migration experience,
- people interested in multilingual education,
- representatives of educational institutions,
- educational authorities.

Language learning increases our awareness of other cultures.

The more languages we know, the easier it gets to learn the next ones.

Language learning can delay age-related deterioration of the brain.

You can become a language learner at any age.

You can become bilingual at any age.
